

I the parent or guardian for _____ understand that Billie's Busy Kids is contracted with a [Child Care Health Consultant](#) (WAC) 110-300-0275 to support our program and to promote the health and development of the children, families and staff in our center. A [Child Care Health Consultant](#) helps the Early Learning Educator to create and maintain a healthy and safe environment for your child while in our care.

The [Child Care Health Consultants](#) will be provided onsite nurse visits to our infant room, as well as by phone or email consultation, as needed. A [Child Care Health Consultant](#) does not typically offer direct nursing services to families but rather shares health and developmental expertise; conducts assessments of child, staff and family health needs; and makes referrals to community resources as necessary or requested by the staff and families.

The [Child Care Health Consultant](#) can assist families in care coordination with their medical home and other health and developmental specialists or assist the childcare provider in addressing developmental concerns with families.

Additionally, the [Child Care Health Consultant](#) should collaborate with an interdisciplinary team of early childhood consultants, such as early childhood education, mental health, nutrition consultants and Early Achievers coaches. The specific health and safety consultation will be addressed in our one on one parent meetings we will have scheduled with you upon enrollment at BBK Early Learning Center, and throughout your child's growth and development while attending BBK.

I give permission for my child to participate in services provided by the [Child Care Health consultants](#).
